Das Portal mit Oberklappe wurde für Fahrzeuge mit der hydraulischen Ladebordwand entwickelt. Dank speziellen Scharnier- Profilen ist eine elegante und wasserfeste Lösung entstanden.

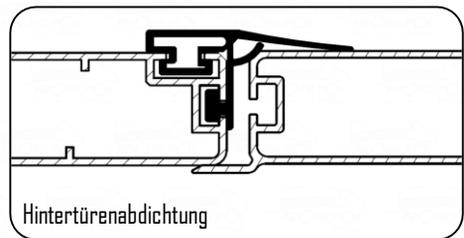

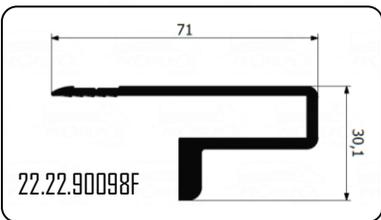

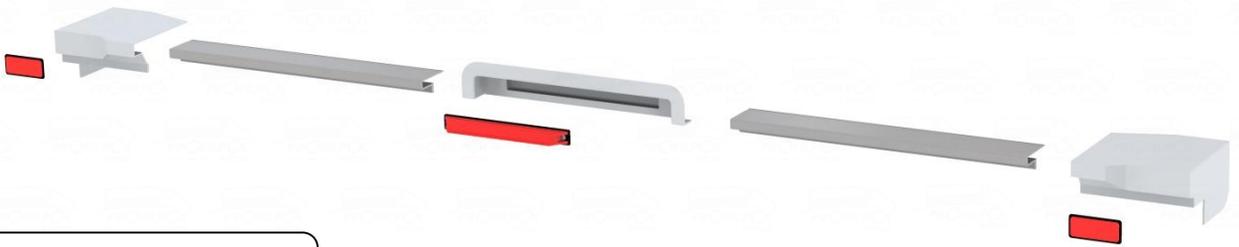

Heckportal ist aus Aluminium gefertigt.

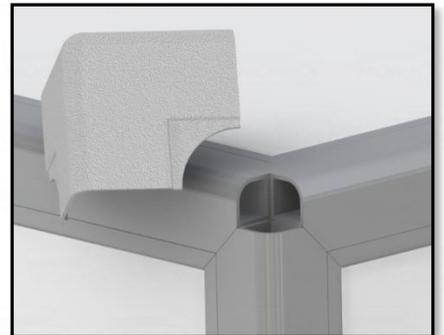

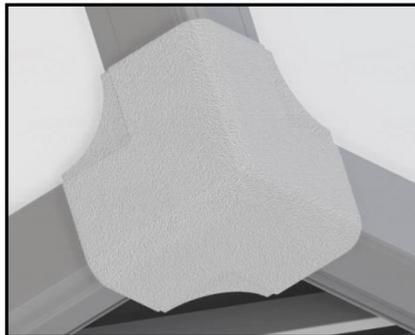

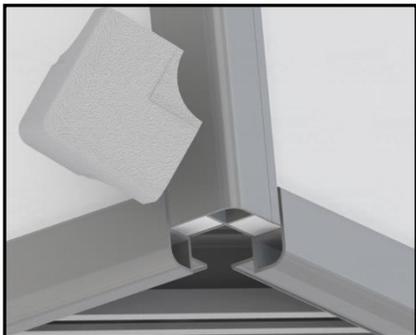

Hecktüren öffnen bis zu 270°.

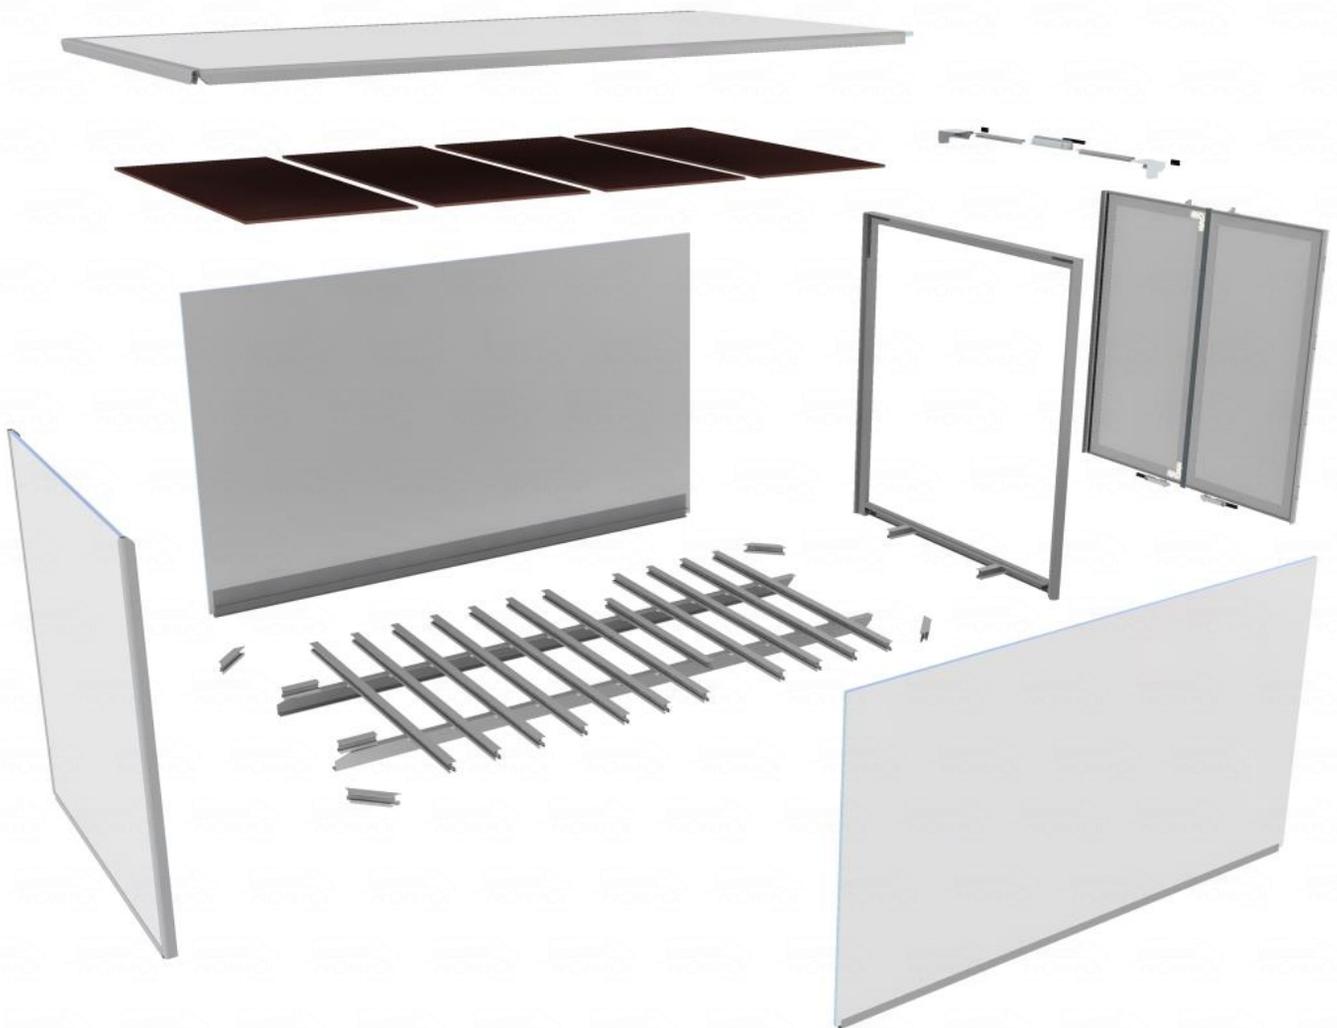

Portalinne bietet Schutz vor fließendem Wasser.

Elegante Eckenfertigstellung mit Kappen.

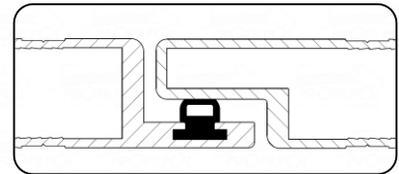

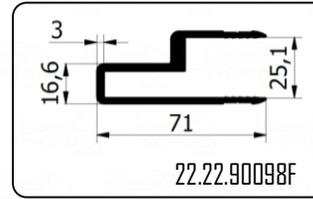

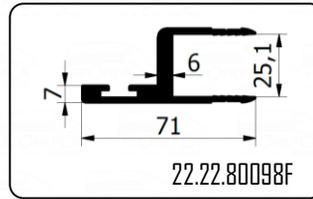

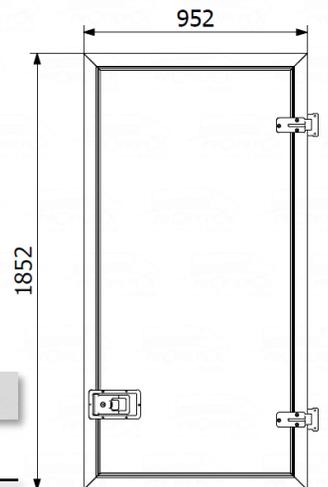

Die Kits bestehen aus allen nötigen Profilen, inclusive Rahmenprofile, nach Maß geschnitten, sowie geschnittenen Sandwichpaneelen, und Verbindungselementen.

**Es ist möglich einen Halbkkit zu bestellen, dh.: die Profile sind in die Paneele vorgeklebt, der Rahmen, die Hecktüren und das Portal vormontiert.**

Die Seitentüren sind auch als ein Nachrüstset erhältlich.
